

World leader in vehicle
de-pollution technology

SEDA SinglePlex START N-52662

SEDA has developed a economical MultiPlex variant, especially for auto recyclers with a low volume of airbags.

Our SinglePlex START is as the Multiplex suitable for all vehicle types. This simplified variation can deploy one airbag at a time. To do this, the cable of the air bag must be connected to the terminals of the unit and using a car battery as the power supply.

Your benefits:

- ✓ Applicable to all vehicles
- ✓ Optical and visual inspection
- ✓ Cost-effective solution
- ✓ Easy to transport and use
- ✓ Ease of use and functionality
- ✓ Universal ignition cables for all airbags

The airbag can be deployed using our 2-Finger safety system as with our Multiplex. The 10 meter long cable lets you stand at a safe distance from the airbag unit when deploying.

TECHNICAL DETAILS

Weight:	0,5 kg
Gate trigger current	
per ignition circuit:	up to 5 A
Ignition time:	250 ms
