

World leader in vehicle
de-pollution technology

SEDA MultiPlex N-52660

The new SEDA MultiPlex is used to trigger all pyrotechnic components in vehicles.

Battery version

Cable version

↔ **UPGRADE-OPPORTUNITY**

**Compatible with
SEDA AirbagMaster**

The MultiPlex is suitable for all vehicle-types. Universal pin-cables allow the connection of the device to different vehicle-control units. Additional adaptors are not necessary. The device is supplied with power through a standard-battery or via cable connection (with a car battery). With the help of a control element, which displays all present airbags, all pyrotechnic parts can be triggered via 2-finger-safety system.

For recyclers, who already use the SEDA AirbagMaster, we recommend the MultiPlex upgrade-set.

In that case the Airbag-Master is reused as control element. The MultiPlex components replace the previously required AirbagMaster-adaptors.

ATTENTION:

- Disconnect the battery or make the vehicle voltage-free
- Carefully merge the plus and minus poles of the battery
- When sparking - search for 2nd battery
- No sparks – use collets to clamp both poles together
- Continue the process ...

MULTIPLEX COMPLETE-SET

Set with SEDA MultiPlex, 2 cable sets, control element, connections & case.

Versions:

52660-AK Battery-version incl. charging device

52660-ST Cable-version with power supply via car battery

AIRBAGMASTER UPGRADE

Upgrade-set with SEDA MultiPlex, 2 cable sets, connections & case.

Versions:

N-52661-AK Battery-version incl. Charging device

N-52661-ST Cable-version with power supply via car battery
