

World leader in vehicle
de-pollution technology

SEDA 4-Fluid Station P-527503

The 4-Fluid Station is a compact and mobile entry-level solution for smaller dismantlers with a de-pollution rate of up to 5 vehicles per day. One strong vacuum pump, 4 tanks and all necessary depolluting tools are integrated in this system.

ADDITIONAL TOOL

As a perfect starter package we recommend the **SEDA fuel kit*** with petrol and diesel kuli, Tank Drilling Machine and all the necessary connections.

Powered by an electric vacuum pump, the 4-Fluid Station helps to remove waste oil, brake, washer and coolant fluid. This de-pollution system is instantly ready to go. Simply use the connection panel and the compressed air plug on the side to empty the 4 intermediate tanks in the main fluid tanks. The 4-Fluid Station is silent, powerful and reliable.

Easy connection

TECHNICAL DETAILS

Integrated tanks: 4 x 80 liters
Air requirement: 1,5 bar (empty)
Power: 750 Watt, 220 Volt
Performance: 21 m³/h
Drainage time: app. 10 min/car
