

World leader in vehicle de-pollution technology

SEDA BlastBox N-52650

SEDA presents a simple and easy to use solution to safely deploy pyrotechnical components of ELV's.

The special characteristic of the BlastBox is ease of use. Simply connect the BlastBox to the vehicle's electronic control unit (ECU), ensuring all ECU socket holes are connected. The BlastBox checks what is available, tests the wires and after checking hereafter the system will deploy the pyrotechnical devices with the remote control.

Also an alligator clip cable is available to connect and deploy individual or removed airbags.

With the option of a simple software update, the unit can be prepared for newer or future car models.

Your benefits

- ✓ No additional adaptors necessary
- ✓ Safe remote deployment
- ✓ Compact box, easy transport
- ✓ Simple handling and functionality
- ✓ Universal pin cables for all vehicle types
- ✓ Software update option
