

World leader in vehicle
de-pollution technology

SEDA Radiator Repair Tools

Ihre Vorteile:

- ✓ Easy handle
- ✓ Can also be used for built-in radiators
- ✓ Huge range of functions
- ✓ Time-saving
- ✓ Simple removing of splinters and other dirt particles

Cleaning Pistol; Testing tank powder Fibre Glass Solder Brush

Radiator Cleaning Pistol

S-20040

In our experience we designed special tools, which facilitate your operations. The SEDA Radiator Cleaning Pistol acts as a high pressure cleaner, which flushes and cleans your radiator. Connect compressed air and water and radiators and other devices can be flushed. Due to the 2 included special Attachments, punctual or comprehensive cleaning is possible.

Workflow:

1. The polluted radiator gets filled with hot water and cold cleaning medium.
2. After a short exposure time the Radiator Cleaning Pistol gets pressed on the outlet flansh of the radiator and the pressurisation valve is pressed.
3. This process shall then be repeated at the inlet and afterwards at the outlet according to the degree of pollution.

TestingTankPowder

Ordernumber(500g): S-21010

Ordernumber (12 x 500g): S-21011

The SEDA TestingTankPowder gives the water a fluorescent green, neutralizes acid and residuals of solder fluid, prevents corrosion and accelerates the sedimentation of dirt particles.

Glasfaser Lötpinsel

Bestellnummer (1 Stk.): S-22001

Bestellnummer (5 Stk.): S-22010

The SEDA Fibre Glass Solder Brush is an efficient and fire resistant soldering tool. The fibres are as long as half of the brush. When they get shorter because of wear, it is possible to pull them out and so the brush can be used longer.
