de-pollution technology

SEDA SludgeCleaner N-52425

The FS-216 fluid and oil sludge cleaner is the perfect solution for the extraction of liquids with dirt or metal particles from the floor, catchment areas or bins.

Typical application is the extraction of cooling liquid of CNC machines, the extraction of oil-containing binders, glass splinters, liquids or water. Contaminated liquid is stored and particles are filtered out. You can remove and empty the container holding the particles that have been filtered out.

The container can be pressurised to remove the liquid from the container.

This mobile device can be used quickly and efficiently where it is needed and supports the ELV operation on a daily basis.

Your benefits

- ✓ Filter cartridge made of stainless steel
- ✓ Strainer basket, 65 liter
- ✓ Additional filters possible
- ✓ Pressure discharge hose (no-maintenance pump is required)

TECHNICAL DETAILS

Drive Power: 3 kw
Current connection: 400 V, 50 Hz
Propulsion: Three-phase compressed air
Air flow: max. 340m³/h
Suction power: 330 mbar
