

World leader in vehicle
de-pollution technology

SEDA TruckStation ED-G

A-51072-EDG

Your benefits:

- ✓ No lifting equipment necessary
- ✓ Explosion proofed tank-drilling unit
- ✓ Spill-free suction with vacuum
- ✓ Residue tank emptying
- ✓ All connections are pre-installed

„Trucks are moving our economy. As well as cars, trucks should be involved in the recycling loop for the recovery of recyclables.“

Rainer Dagn
SEDA CEO, Austria

Truck De-pollution System without need of a lifting ramp

Dismantling of trucks, buses or other heavy vehicles are increasingly important for recyclers worldwide. Together with them, SEDA developed new solutions.

Old trucks, buses and other heavy vehicles have other requirements for its recycling than cars. To empty trucks without lifting platforms properly of diesel, used oil and other fluids, the SEDA drilling device has been specially adapted. Adjusted underneath the tank, the extraction is done after the drilling process automatically.

Mobile and easy to clean collecting trays with 110 liter capacity catch transmission and engine oil and cooling fluid smoothly. High performance pumps are used for sucking the liquids, which are filtered and pumped into their respective storage tanks.

World leader in vehicle
de-pollution technology

SEDA TruckStation ED-G

A-51072-EDG

**Easy attaching at the tank
and drilling**

**Mobile collecting trays for
waste oil & coolant fluid**

Easy handling without lift

Truck De-pollution System without need of a lifting ramp

Due the collecting trays and special drilling device, **the vehicle must not be raised**. Due drilling, the tank will be completely emptied as compared by emptying the tank filler neck. If brake fluid is available, it can be easily removed by the use of brake pipe or hose pliers.

Your benefits:

- Strong, low maintenance double diaphragm pumps
- EX-certified drilling unit
- Designed specially for trucks
- Integrated dirt filter
- Simultaneous collecting different liquid
- Fuel quality control
- Industrial Hose
- High quality production
- Clean & Safe
- Compact dimensions

About 10 minutes
drainage time per
vehicle

TECHNICAL DETAILS

Air pressure: 8,5 bar – 1.100 l/min
Air consumpt.: 6000 l/car
Drainage time: 20 min/vehicle*
Fluid drainage: Petrol/Diesel: 14l/min
 Waste oil: 12 l/min
 Hydraulic oil: 10 l/min
 Coolant fluid: 8 l/min
 Washer fluid: 8 l/min
 Brake fluid: 3 l/min
Size: 2,2 x 0,5 x 1,8 m
Space needed: 15 x 4 x 6 m
