The catalyst converter is regarded as the most profitable part of an end-of-life vehicle. The SEDA CatalyticCutter removes them in just a few seconds without requiring great strength and without damaging it.

The SEDA CatalyticCutters are the optimal solutions for removing catalysts and exhaust systems. Weber Hydraulik has specially optimized and improved their devices for the specific requirements of recycling companies in conjunction with SEDA.

Our optional mobile stand 360° with catalytic converter catchment tray enables easy transport of the cutter and the aggregate in order to facilitate the usage significantly and prevent any injuries or damages!

Spare parts like blades and conversion kits are available.

Also available in battery version - for further information please contact your SEDA partner!
**Your benefits:**

- Compact design
- Strong cutting power
- Optimized cutter profile with special cutting notches
- Blades are easy to replace
- Mobile and organized with wheel stand

**Easy blade replacement from RSX 180**

**What does RSX mean?**

- New Xtreme cutter technology
- Low cutting strain due to massive overlapping of the blades
- Clasps the material to cut
- Shorter blades for better maneuverability

**Special blade shape with several cutting ribs**

**Compact design**

**Safety monitoring device according to EN 13204**

**High cutting performance**

**Perfect size**

**Can be optimally supplemented with mobile standing unit**
