The catalyst converter is regarded as the most profitable part of an end-of-life vehicle. The SEDA Catalytic Cutter removes them in just a few seconds without requiring great strength and without damaging it.

The SEDA Catalytic Cutters are the optimal solutions for removing catalysts and exhaust systems. Weber Hydraulik have improved their devices for the specific requirements of recycling companies in conjunction with SEDA offering many sizes and solutions for today’s operations.

Our optional mobile stand 360° with catalytic converter catchment tray enables easy transport of the cutter and the motor in order to facilitate the usage significantly and prevent any injuries or damages! Spare parts like blades and conversion kits are available.

Also available in a battery version - for further information please contact your SEDA partner!
SEDA
Catalytic Cutter
Special tools

Hydraulic Cutting Tool

- New Xtreme cutter technology
- Low cutting strain due to blade development and design
- Clasps the material to cut
- Shorter blades for better maneuverability

Your benefits:
- Compact design
- Strong cutting power
- Optimized cutter profile with special cutting notches
- Easy to replace blades
- (Optional) mobile stand available

Easy blade replacement from RSU 180 / RSU210
