SEDA Tank Drilling Machine HD Type Truck V19

S-52027-V19

Extraction via the suction lance

Your benefits:

- Air controlled
- Use on Both plastic & steel tanks
- Extraction via drill or suction lance
- Quiet and powerful
- Explosion proof (ATEX)

Fuel tank drilling device for Trucks

The SEDA tank drilling device HD is used to extract petrol and diesel from metal or plastic tanks (not to be used on stainless steel tanks) for all commercial vehicles.

Due to the extremely low construction it is suitable for very low hanging tanks (21 cm floor clearance still offers enough space fluid removal).

The device can be operated comfortably while standing - a positioning mirror ensures a clear view of the drilling process.

The removal takes place either from below via the ATEX-certified drill or from above via the suction lance.

TECHNICAL DETAILS

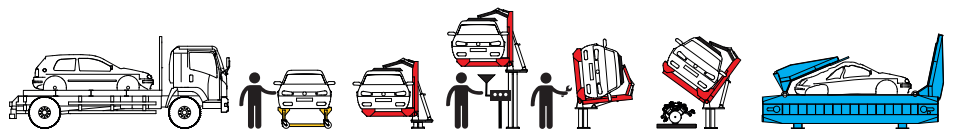

Weight:	102 kg
Compressed air supply:	8 bar
Special drill ø:	20 mm
Rotation speed:	max. 220 U/min
Cutting speed:	max. 10,4 m/min
