

SEDA JUMBOLINE

A-51073

US version for heavy vehicles

End-of-life vehicle depollution system

The system includes an integrated suction system with double diaphragm pumps. The Jumboline vehicle carrier can be installed on a galvanized platform. A fuel quality control unit enables visual inspection of fuel, while filters for fuels and used oil ensure clean processing. Mounted on a swivel arm, the tank drilling device features gas-pressure-assisted height adjustment for gasoline and diesel. Additionally, a swivel arm with pneumatically adjustable dual funnels is available for used oil. The setup also includes a compressed air connection with an 8-meter hose reel, a coolant connection with a 7-meter hose reel and coolant probe, and a windshield washer connection with a 7-meter hose reel and suction lance set. Brake fluid is extracted using specialized rubber nipples and transparent hoses. A maintenance unit ensures dry and lubricated air for reliable system performance.

BENEFITS

- Complete solution
- Compact design
- Integrated pumps
- Permanently welded galvanized platform
- Galvanized safety grates
- High safety standards with CE and ATEX certification

End-of-life vehicle depollution system

- 1 Heavy-duty tank drilling device
- 2 Vehicle carrier type Jumbo
- 3 Fuel quality control system
- 4 Fast and efficient fuel drill
- 5-9 Double diaphragm pumps for gasoline, diesel, used oil, coolant, and windshield washer fluid
- 10 Vacuum trolley for brake fluid (no image)
- 11 Pump housing with tools, hose reels, and filters
- 12 Swivel arm for tank drilling device
- 13 Swivel arm for used oil with dual funnels
- 14 Galvanized steel platform with safety grate

TECHNICAL SPECIFICATIONS

Compressed Air	8,5 bar - 1.350 l/min
Fluids	Gasoline / Diesel Used Oil Brake Fluid Coolant Windshield Washer Fluid
Weight	3.500 kg
Size	6,5 x 2,5 x 2,4 m
