

SEDA MDS9 CONTAINER JUMBOLINE

C-50154

Pre-installed quick couplings for tank lines

BENEFITS

- Robust and high-performance system for large vehicles up to 4 tons
- Ready for immediate use and easy to maintain
- Spacious working area with additional on-board work aids
- All connections are pre-installed

Mobile End-of-Life Vehicle Depollution System

The MDS9 JumboLine container offers a state-of-the-art, comprehensive solution for the mobile decommissioning of end-of-life vehicles weighing up to 4 tons (trucks, minibuses, vans, etc.).

Designed as a roll-on roll-off container, it is equipped with a fully integrated fluid drainage system. The container's lid can be opened and serves as a roof, providing effective protection against adverse weather.

Inside the container, a vehicle carrier with a load capacity of 4 tons and floor pans compliant with WHG §19I are securely installed. Additionally, the container includes essential work aids such as a workbench and a toolbox.

The fluid drainage system features pumps for brake fluid, gasoline, diesel, waste oil, coolant, and windshield washer fluid, all housed in a separate pump cabinet with pressure gauges and controls. The system is further equipped with a fuel tank drilling device, fuel quality inspection containers, swivel arms for the tank drilling device and waste oil funnel, hose reels (for coolant, windshield washer fluid, and compressed air), and additional accessories.

Side door for easy access

Mobile End-of-Life Vehicle Depollution System

All necessary hoses and quick couplings are pre-installed in the container, making the system immediately ready for use. Complementing the MDS9 container, SEDA offers an optional mobile storage tank platform equipped with five high-quality tanks for operating fluids (gasoline, diesel, waste oil, coolant, and windshield washer fluid).

For standalone operation, a platform with a generator and compressor is also available, ensuring independent power and compressed air supply.
