- Additional technical specifications
- Online configurator

 DISMANTLING

AIRBAG RECYCLING

### Safe airbag deployment

**SEDA has developed an affordable solution specifically for auto recyclers with a low airbag workload: the SinglePlex START.**

This device is compatible with all vehicle types and enables the neutralization of one airbag per operation. The unit's clamps are connected to the respective airbag in the vehicle, with power supplied by a car battery.

Deployment is carried out via a two-finger safety system, ensuring maximum safety. Additionally, a 10-meter cable provides a safe distance from the airbag during the activation process.

### TECHNICAL SPECIFICATIONS

Weight	0,5 kg
Ignition current per Ignition circuit	up to 5 A
Ignition duration	250 ms

### ORDER NUMBER

A-52662	SEDA SinglePlex START
A-52660	Alternative device SEDA MultiPlex
