Plastic granules

Complete electrical cable recycling system

A complete recycling system for automotive cables

The system includes the SEDA Cable Shredder 315 EKO, complemented by a pre-shredder with a conveyor belt, a magnetic separator, and a powder dosing unit to prevent screen clogging.

Complete systems can be tailored to the needs and specific demands of our customers. For optimal results, it is recommended to mix automotive cables with household installation cables, removing all plugs and attachments beforehand is essential.
