

SEDA TRUCKSTATION ED-G

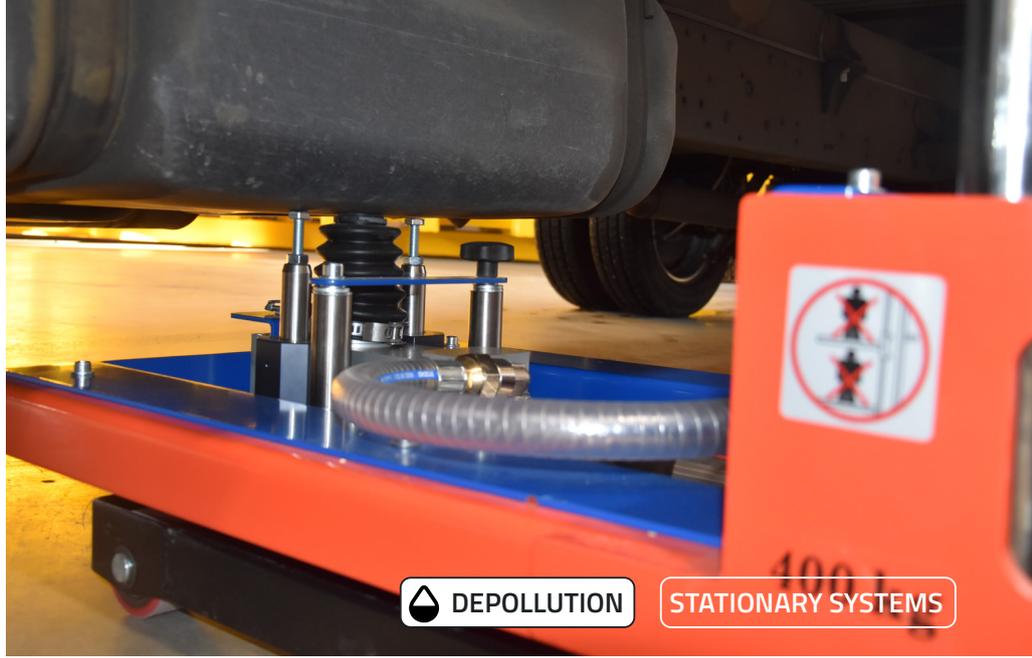

A-51072-EDG

Easy attachment to the tank

BENEFITS

- Truck depollution without vehicle lift
- Drip-free suction under vacuum
- Complete tank drainage
- All connections pre-installed
- Explosion protection with ATEX-certified tank drilling device

 DEPOLLUTION

STATIONARY SYSTEMS

Truck Depollution System

To efficiently drain diesel, used oil, and other fluids from trucks without the need for lifting platforms, the SEDA Truckstation ED-G was developed.

After precise positioning under the tank, fuel extraction is carried out automatically following the drilling process. Mobile collection trays with a capacity of 116 qt, which are easy to clean, reliably collect transmission and engine oil as well as coolant. Thanks to the combination of the drilling device and collection trays, lifting the vehicle is no longer necessary.

Truck Depollution System

Drilling into the tank allows for a more thorough drainage compared to the traditional method through the fuel filler neck. If brake fluid needs to be extracted, this is easily done using special clamps for brake lines or hoses.

Additional Advantages:

- Powerful, low-maintenance double diaphragm pumps
- EX-certified drilling machine
- Specifically designed for trucks
- Integrated dirt filters
- Simultaneous collection of different fluids
- Fuel quality control
- Industrial hose reels
- High-quality workmanship
- Clean and safe operation
- Compact dimensions

A mirror simplifies the positioning of the drill on the vehicle tank

TECHNICAL SPECIFICATIONS

Compressed Air	120 psi -39 CFM
Fluids	Gasoline / Diesel Used Oil Hydraulic Oil Brake Fluid Coolant Windshield Washer Fluid
Size	87 x 20 x 71"

ORDER NUMBER

A-51072-EDG	SEDA Truckstation ED-G Depollution system for trucks without vehicle carrier
A-51072	Alternative system: SEDA Truckstation ED A lift or ramp with a height of 65 to 77" is required
