In-ground dismantling tilt lift

Easy Loading with the optional SEDA vehicle trolley

The SEDA Tilt Lift TL-1 is an in-ground lift with a specialized tilting function that lets the worker move the vehicle without the need for a forklift or crane.

The vehicle is positioned on the tilting lift using a forklift or trolley and secured with a roof clamp for rollover safety. The securing arm can be adapted to all common car models with various optional attachments. Once the vehicle is secured, it can be tilted (rotated) up to 90°. Additionally, the SEDA Tilt Lift allows for a stepless elevation of the vehicle up to a maximum height of 1800 mm.

BENEFITS

- Simple and ergonomic vehicle handling
- Inground installation
- Stepless 90° rotation
- Available with lifting heights of 2 or 6 ft
- Hydraulic control system

This makes it effortless for the worker to perform any tasks around the vehicle.

In-ground dismantling tilt lift

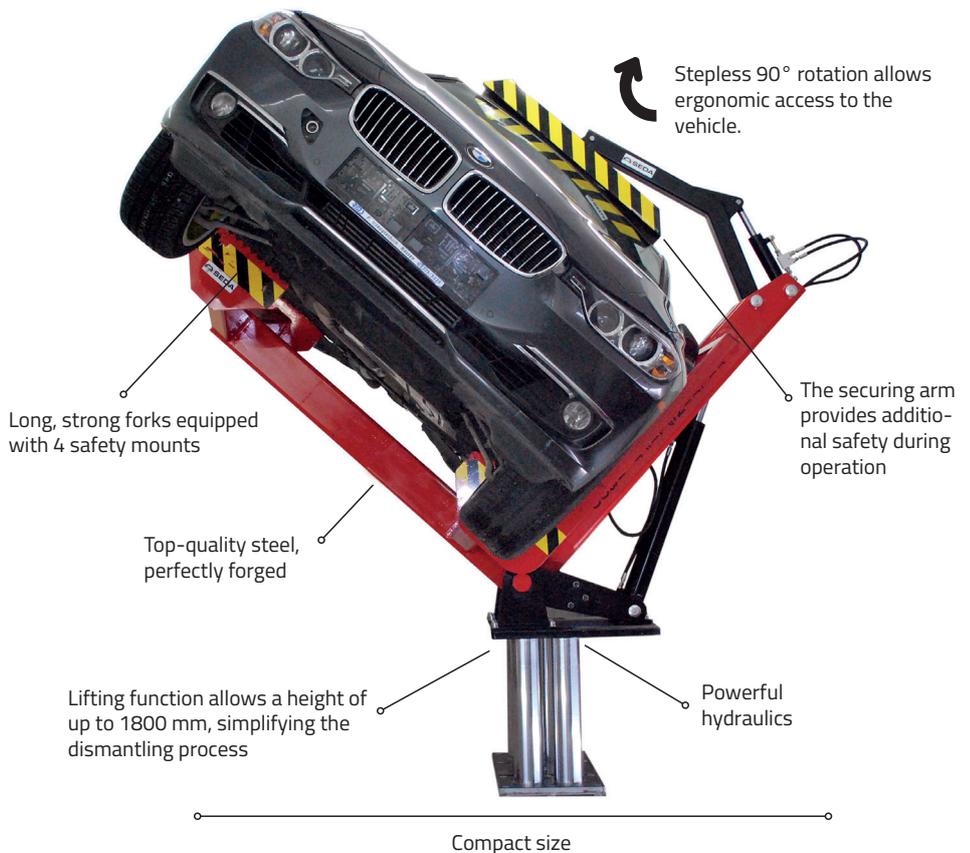

Easy access and ergonomic design

Easy control for efficient operation

The Tilt Lift TL-1 is designed for full dismantling of vehicles including engines and transmissions. In the tilted position, screws and fasteners can easily be removed and the lifting function makes it easy to access the underside and remove heavy components.
